

LIVE DEMO — FOR COMIC PUBLISHERS

ACBF Panel Editor

Turning a comic archive into a panel-by-panel reading
experience — without redrawing a single page.

.CBZ

/

.CBR

.ACBF

THE IDEA

YOU ALREADY HAVE THE PANELS. NOW THE READER CAN FIND THEM.

INPUT

Page

One flat raster image, exactly as it sits in the archive today.

EDITOR DRAWS

Panels

Each panel becomes its own shape — a rectangle, or any polygon.

READER FOLLOWS

Reading order

The sequence you set is exactly the path the reader is guided through.

WHY READERS CARE

A PAGE BUILT FOR PRINT ISN'T BUILT FOR A PALM

Small screens, full pages

Shrink a print-lettered page to a phone and the dialogue goes illegible before the art does.

Guided, not zoomed

Guided View pans and zooms to every panel automatically, in reading order — no pinching, no hunting for the next line.

Runs on their device

No upload, no server round-trip. The reader's copy of the issue never leaves their phone.

DROP IN THE ARCHIVE

1

Open the .cbz or .cbr you already have — nothing to re-export first.

- An on-device model reads the page and outlines every panel
- This page: 6 panels found and numbered in under two seconds
- No file ever leaves the browser

CORRECT THE DRAFT

2

Every panel is a shape, not just a box.

- Drag a corner to resize, an edge to trace an angled border
- Add, delete, or redraw a panel from scratch
- Drag panels in the list to fix reading order

THE READER'S VIEW

3

Export, and the reader gets an automatic path through the page.

- One panel at a time, in the order you set
- Pan & zoom, fade-to-black, or Cinematic (shown here)
- Cinematic spotlights the current panel, dims the rest

THE FINE PRINT — READ IT ANYWAY

NOTHING TO LOSE BY TRYING IT

0 UPLOADS

Every archive stays on your own machine, start to finish — the editor never phones home.

OPEN FORMAT

ACBF is a public spec, not something locked to this reader or this company.

1 ISSUE

is enough to try it end to end — no migration, no contract, no commitment.

FOR YOUR ARCHIVE, SPECIFICALLY

WHAT CHANGES ON YOUR END

YOUR ARCHIVE

Works as-is — no re-scanning, no re-lettering, no format change.

YOUR READERS

A phone-native way to read a page that was drawn for print.

YOUR DATA

The panel map is a file you keep — export it, edit it later, or walk away with it.
